

WHO WE ARE

OPDIMA provides services for industrial plant projects including cement, energy, oil, gas and storage facilities. It also provides services for residential and commercial construction projects.

OPDIMA continues to add ambitious and important projects to its portfolio with its professional team.

OPDIMA focuses on providing high quality technical solutions to all its customers. First of all, our insistence on customer satisfaction and quality service brings us to continuous growth and success.

OPDIMA is a dynamic group which operates in Turkey, the Middle East, West Africa and South Africa.

Our company is constantly developing in accordance with the needs of our customers and new opportunities emerging in the global market.

Our target is to become a respected business partner in the sector with new and more effective solutions by continuously improving the services we offer.
